

## Data Declaration

### Table 20

#### Murder by State, Type of Weapon, 2007

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

#### General comments

- This table provides the type of weapons used in murder offenses. The data are based on the aggregated data from agencies within each state for which supplemental homicide data (i.e., weapon information) were reported to the FBI. The table also includes a breakdown of the types of firearms used in murders (i.e., handguns, rifles, shotguns, or firearms [type unknown]).
- The data in this table were collected via the UCR Program's Supplementary Homicide Report (SHR), the monthly law enforcement report submitted by agencies concerning homicides.
- The SHR data submitted by Florida and Washington, D.C., did not meet UCR guidelines and were not included in this table.
- The FBI received limited SHR data from Illinois.

#### Methodology

- The data used in creating this table were from all law enforcement agencies that submitted supplemental homicide data for 2007.
- The weapon totals are aggregated from all murders for which the FBI received supplemental homicide data for calendar year 2007.
