Data Declaration

Table 58

Arrests, Nonmetropolitan Counties, by Age, 2007

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

General comments

- This table provides the number of persons arrested in nonmetropolitan counties in 2007 for the 29 offenses for which the UCR Program collects arrest data. These data are broken down by age of the arrestee and include the percent distribution of arrests by offense type.

- The Nonmetropolitan Counties classification encompasses jurisdictions covered by noncity law enforcement agencies located outside currently designated Metropolitan Statistical Areas. (See Area Definitions.)

- These data represent the number of persons arrested; however, some persons may be arrested more than once during a year. Therefore, the statistics in this table could, in some cases, represent multiple arrests of the same person.

Methodology

The data used in creating this table were from all nonmetropolitan county law enforcement agencies submitting 12 months of arrest data for 2007.

Population estimation

For the 2007 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2000 decennial population counts and 2001 through 2006 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2006 Census population estimate to derive the agency's 2007 population estimate.
