

## Data Declaration

### Table 3

#### **Crime in the United States, Offense and Population Percent Distribution by Region, 2008**

The FBI collects these data through the Uniform Crime Reporting (UCR) Program.

#### **General comments**

- This table provides the 2008 percent distribution of violent crime, property crime, murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft offenses by region.
- The UCR Program does not have sufficient data to estimate for arson.

#### **Methodology**

- The data used in creating this table were from all law enforcement agencies participating in the UCR Program (including those submitting less than 12 months of data).
- Crime statistics include estimated offense totals (except arson) for agencies submitting less than 12 months of offense reports for each year.

#### **Regions and geographic divisions**

The U.S. Census Bureau has established the four regions of the United States along with nine geographic divisions that the UCR Program uses to compile the Nation's crime data. The following table lists the 50 states and the District of Columbia arranged according to the regions and geographic divisions of the United States.

## **Population estimation**

For the 2008 population estimates used in this table, the FBI computed individual rates of growth from one year to the next for every city/town and county using 2000 decennial population counts and 2001 through 2007 population estimates from the U.S. Census Bureau. Each agency's rates of growth were averaged; that average was then applied and added to its 2007 Census population estimate to derive the agency's 2008 population estimate.
