Unidentified Homicide Victim

On October 16, 1997, a man hunting in a wooded area near Indian Creek Road, south of Kelly Springs Road, close to Huntsville, in Madison County, Alabama, discovered skeleton remains wrapped in plastic sheeting commonly used in building construction, which was secured with gray duct tape. The crime scene was processed and the body was recovered and transported to the Alabama Department of Forensic Sciences, Tuscaloosa, Alabama for examination.

Skeletal Remains Examination

An examination of the skeletal remains rendered the following findings. The skeletal remains are that of a white female, approximately 15 to 19 years old, between 4 feet 10 inches to 5 feet 1 inches tall, with shoulder length dark blond or light brown hair with a possible reddish tint; and a gap between the two upper front teeth. The victim may have been wearing a white with blue broad stripes casual, sleeveless top, size unknown, which was found near the skeletal remains outside of the plastic sheeting. Color of eyes and estimation of weight could not be determined. No jewelry was recovered. It is believed that the victim had been deceased for a period of up to one year before the skeletal remains were discovered. Based on the evidence collected it is suspected that victim died as the result of homicide. The victim's NCIC number is U071281620.
