

Attention: Academy of General Dentistry; and Homicide, Missing Persons, and Crime Analysis Units

On January 25th, 1986, a partially-clothed female body was discovered along I-70 in rural Saline County, Kansas. All attempts to identify this female have been unsuccessful.

The victim is described as a white female about 25-30 years old, 5'5", weighing 125 pounds, having brown hair with frosted highlights, and blue/gray colored eyes. The body had notable scars to include: an appendectomy scar; a 1" scar on the jawbone to the left of the chin; a ¾" scar from the jawbone to below the left cheek area; and a circular-shaped ¾" scar on the right knee. Stretch marks were visible on the abdomen.

A complete dental examination of the victim was conducted by Dr. John Adams, D.D.S., on February 4, 1986. Dr. Adams has complete dental x-rays available and should be contacted regarding any possible comparisons or dental questions. Dr. Adams can be reached at 785-825-1659. The following is the dental condition worksheet of this victim prepared by Dr. Adams:

Maxilla:	Mandible:
Tooth #1 Missing, No Socket.	#17 Missing, No Socket.
